The magic of CLICK! can pretty much be summed up with two words: positive energy. That being said, creating that positive energy takes some hard work. Authors Annabel Monaghan and Elisabeth Wolfe have made that battle easier by creating a book that will have you "clicking" in no time. No matter how old you are, you've undoubtedly had experiences where you've seen things clicking into place for other people. For some, these "happenings" seem to be almost magical in how they come to be. When you read CLICK!, though, you'll realize that these people who seem to have everything fall into place have probably put some thought, along with some really hard work and positive energy, into getting what they want. CLICK! guides you through it all -- figuring out what you want from life, whether it be a prom date, a good grade on an important test, or even just an easier time

at home with your parents -- and provides you with step-by-step instructions on how to go about getting what you want. It's all a matter of positive energy, people! Filled with tips, tricks, pop quizzes, real life scenarios, and even a day planner to map out your goals and how you plan to achieve them, this is the perfect book for any teen. Give it your sister, cousin, best friend...everyone can benefit by changing the way they think, and by putting that positive energy to good use! Reviewed by: Jennifer Wardrip, aka "The Genius"

I couldn't put the book down...and ordered 3 copies for friends! The world would be filled with happier people if everyone would read this book and follow its advice! Buy this books and look forward to changing your life!

This is a book that no teenage girl should be without. It's never too early for girls to learn how to take control of their destiny.

okay just received Click! from .com-read it in 2 days-gotta say this book is totally worth the read.not corny, really funny, and has a great message.hahaa i even like this book so much so that i actually logged back onto to write this review.(if you like the gossip girl series, then you'll love this book.)

I wish I had this book at thirteen! What a beautiful and creative way to inspire girls to KNOW they can do, be, and have all that they want. I babysit for a thirteen-year-old-girl (and I'm talking about a "hip" teenager) who was glued to it and then I picked it up and couldn't put it down! Even In my mid-20's I could certainly adopt these brilliant approaches to making the most out of my life, and I promise you'll laugh all the way through. It's refreshing to know there's material out there that attracts young girls who truly want to get the most out of life. Thanks to Click! they now can! I think Monaghan and Wolfe need to write Click! the mid-20's guide to getting what you want!

Click! is all about taking control. Relying on past experiences, Monaghan and Wolfe divulge their secrets to success. And best of all? Anyone can do it. All you need to know is how to focus your energy and concentrate on your goals, and you can make anything happen. Fun and easy to read, girls of any age can benefit from Monaghan and Wolfe's direction. Click! even includes a daily journal to help you achieve what you've been wishing for. What better way to help you stick to your New Year's Resolutions than by following the advice in this helpful and infinitely useful book? This book is easy to read, entertaining and has a great message that every girl needs to hear! If everyone in junior high and high school would read this book, girls would be much more fulfilled, less concerned about what others want them to be and more focused about who THEY want to be. Great pick!

None of the folks who reviewed this book mentioned that it is based on the Law of Attraction, a new age concept. It is a clever packaged rewrite for teens of The Secret. The goals held up for girls are for the most part materialistic and self seeking. Pseudo science explanations abound in the first chapter for why the techniques offered in the book work to get what you want. There is a lot of truth to the advantages of thinking positively, writing down goals, visualizing and imagining how you will feel when you reach the goal to motivate you to attain your goals. Unfortunately this common sense stuff is marketed as an e-vite to the Universe (note the capitalization) which will respond automatically to thoughts, positive or negative. Another message of the book is to focus on happiness as a goal. While the authors do a good job of warning that things and experiences do not bring lasting happiness, they seem to equate happiness with the process of getting what you want. The truth that happiness is a direct result of being other-centered rather than self-centered is never included in this book's philosophy of happiness. Thumbs down from this mother of 4 girls.
