Customer Reviews

I bought this book prior to an eight day trip to Montana, specifically to photograph wildlife in the National Bison Range. I had been there a couple of times in the past, but this time I came equipped to photograph the animals! We made 8 trips through the range at various times of the day during our visit to the area. The book was very helpful in planning those trips and the short hikes available in the range. Plus it is full of beautiful photographs for inspiration. The loop road through the range (a one way trip) on a dirt road was different every time we made the trip. We saw so much wildlife we captured over 1700 images. 160 miles travel on a dirt road seems like a lot, but it was well worth it! I highly recommend this book for anyone interested in visiting the National Bison Range as well as those who are simply interested in a great book about a great place, and a hugely successful conservation effort.

Buffalo country: America's National Bison Range by wildlife photographer Donald M. Jones is a softcover photographic gallery of splendor of Montana wildlife. Beautiful, full-color images on every

page of the Bison Range environment, flowers, and animals from rams and deer to owls, mountain bluebirds, mink, and turtles provide lavish illustration, while the text recounts the story of how bison recovered from near-extinction, how the National Bison Range was created, and the tale of Big Medicine, the sacred white buffalo. Especially recommended as a giftbook for nature lovers.

A TREMENDOUS ALLY FOR RESEARCH OF THE AMERICAN BUFFALO. ANYONE WISHING ARTISTIC VIEWS OF THIS WONDERFUL YELLOWSTONE ICON SHOULD HAVE THIS BOOK.
